Product Description: The assembly consists of 2Nr modules to form an installed length of 1850mm in the van. **Storage Racks:** A tier storage unit manufactured from quality 12mm thick hardwood Plywood, with removable 6mm plywood dividers at approximately 120mm spacings which gives the added benefit of a very flexible storage rack. Simply add or remove to suit your requirements. **Power Tool / Tool box storage:** A 5 Tier power tool / tool box storage unit with angle trays which are height adjustable in 50mm increments **Notes:** Some trimming of end panels may be required due to differences in ply lining kits. The Right hand end panel will require trimming to suit the wheel arch. Extra shelving rows can be requested for an additional cost. For more information / enquiries, please [Contact Vanrack](#) |
