Fits to: Driver Side / Passenger Side

Price: £210.00

Stock: In stock

Category: [Nissan NV 200 Shelving](#)

Product Description: The assembly consists of 2Nr modules to form an installed length of 1500mm in the van. The front rack, aside the driver bulkhead, faces outward to enable access from outside the vehicle. The shelving system is manufactured using quality 12mm hardwood Plywood, giving strength and also keeping weight to a minimum. Constructed using traditional mortise and tenon joints in the front, back, base, and sides, making the units extremely durable and strong. Shelf heights are adjustable in 50mm increments. The shelving units are supplied fully assembled that then simply need bolting between side panels. A full fixing kit is provided along with fitting instructions.

- Shelf Heights are adjustable in 50mm increments
- The shelving units are supplied with 6mm plywood dividers that slide into machined grooves. These can be added or removed to change the number of compartments required.
- The product is not handed, i.e. this will fit in either the RH or LH side of the van.

Notes: Some trimming of end panels may be required due to differences in plylining kits. Please note that extra shelving rows can be requested for an additional cost. For more information / enquiries, please [Contact Vanrack](#) |
